

# FIRE EVACUATION ROUTE + TORNADO PREPAREDNESS

## OSHA Recommendations

### Fire Evacuation Plan

**RED**—Primary Evacuation Route

**BLUE**—Secondary Evacuation Route

**YELLOW**—ADA Evacuation Route

Designated assembly area—every person exiting the office should assemble across Wyandotte St. into the alley-way and report the senior most leader in the present group.

### Tornado Preparedness and Response

In the event of a tornado warning, seek shelter, in an underground area, such as a basement or storm cellar, provides the best protection from a tornado. If an underground shelter is unavailable, consider the following:

- Seek a small interior room or hallway on the lowest floor possible
- Stay away from doors, windows, and outside walls
- Stay in the center of the room, and avoid corners because they attract debris
- Rooms constructed with reinforced concrete, brick or block with no windows and a heavy concrete floor or roof system overhead
- Avoid auditoriums, cafeterias and gymnasiums that have flat, wide-span roofs.
